PROFESSIONAL SUMMARY

Mechanical Engineering student (CGPA: 7.9/10) with hands-on experience in CNC Turning, CNC Milling, and EdgeCAM at Titan Company Limited. Skilled in SolidWorks, AutoCAD, and ANSYS. Smart India Hackathon 2024 Finalist and national dirt bike champion. Seeking core manufacturing or design engineering roles.

EDUCATION

Sri Krishna College of Engineering and Technology <i>B.E. – Mechanical Engineering</i> CGPA: 7.9 / 10.0	Sept 2023 – Mar 2027 <i>Coimbatore, India</i>
G.R.Damodaran Matriculation Higher Secondary School <i>Higher Education (12th)</i> Percentage: 85%	Mar 2022 – Apr 2023 <i>Coimbatore, India</i>

INTERNSHIP EXPERIENCE

Titan Company Limited – SS/Analog Plant <i>Manufacturing Intern</i> Worked on CNC Turning and Milling for precision watch components and used EdgeCAM for CAM programming and tool path generation in a high-precision manufacturing environment.	2025 <i>Coimbatore, India</i>
Texmo Pumps (Aqua Sub Unit-5) <i>Manufacturing Intern</i> Handled core foundry operations including sand casting and mold assembly, along with material analysis and quality inspection to ensure components met industry standards.	2024 <i>Coimbatore, India</i>
MEK Consultancy <i>Design Engineering Intern</i> Assisted in creating engineering designs and technical drawings using CAD software, supporting senior engineers in design optimization and client requirement translation.	2024 <i>Coimbatore, India</i>

TECHNICAL SKILLS

CAD/CAM Software: SolidWorks, AutoCAD, EdgeCAM
Simulation & Analysis: ANSYS (Structural, Thermal)
Manufacturing Processes: CNC Turning, CNC Milling, Sand Casting, Foundry Operations, Precision Machining
Programming Languages: C++, Python
Manufacturing Standards: 5S (Lean Manufacturing), IoT Integration, Quality Control
Productivity Tools: MS Excel, MS Word, MS PowerPoint, Google Workspace
Soft Skills: Team Collaboration, Problem Solving, Decision Making, Project Management, Leadership, Attention to Detail

PROJECTS

Smart Earth Leakage Detection System <i>Smart India Hackathon 2024 Finalist</i> An IoT-based battery-powered sensor system for detecting earth leakage with real-time monitoring, pole location mapping, and automated alarms — built and presented at the national level under the Ministry of Housing and Urban Affairs.
Rider Safety System & Smart Helmet An integrated two-part safety solution combining accident detection with automatic emergency alerts and a smart helmet featuring alcohol detection, drowsiness monitoring, and blind spot alerts — aimed at reducing road fatalities.
Design & Development of an Off-Road Dirt Bike for Rugged Terrain Full-cycle design and fabrication of a competition-grade dirt bike built for rugged terrain using structural analysis and smart material selection — won Overall Championship at the AIIMS RALLER'Z national event.

KEY ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon 2024 Finalist** – Smart Earth Leakage Detection System
- Overall Champions** – AIIMS RALLER'Z National Dirt Bike Competition (Team Rage Mantel)
- Runners** – Rivals National Dirt Bike Competition (80's Rage Mantel)
- Industrial Trainee** – Li-ion Battery Manufacturing, NIT Tiruchirappalli
